

SWITCHGEAR AND POWER DISTRIBUTION SOLUTIONS

POWERING THE FUTURE

Applications

Data Centers

Industrial Buildings

Commercial Buildings

Generators

Green Technology

- PACKAGE SUBSTATIONS
- LOW VOLTAGE DISTRIBUTION SWITCHGEAR
- MEDIUM VOLTAGE DISTRIBUTION SWITCHGEAR
- POWER DISTRIBUTION UNITS (PDU)
- CONTAINERISED UNITS
- REMOTE POWER PANEL (RPP)
- AUTOMATIC TRANSFER SWITCHES (ATS)
- IN-HOUSE METALWORK AND COPPER
- BUSBAR DESIGNS AND BUILDS
- CONTROL AND MONITORING SOLUTIONS
- SUPPORT AND SERVICE

Low & Medium Voltage Switchgear

Markets

Data centers
Key industrial segments
Sanitation & Utilities
Oil and gas
Hospitals &
Institutional facilities
OEM and private labeling

Design

Standard and Custom
ANSI, UL & IEC Standards

ABOUT

WASP CPS provides a complete switchgear solution; Designing, manufacturing, testing, start up, and field services. Making your switchgear projects a simple process is our mission. Working in partnership with WASP Critical Power Solutions to complete your project on time and on budget.

Low Voltage

ANSI, UL, and IEC Standards
Current: 600-12,000A
Voltage: 220-600V
NEMA 1 and NEMA 3R, IP ratings
UL 1066 Circuit Breaker
Short-circuit withstand rating up to 200kA
Front and rear accessible

Medium Voltage

ANSI, UL, and IEC Standards
Voltage: 5,000V - 38,000V

OFFICES IN

USA, UK, Mexico, Poland

DISTRIBUTION IN

Over 100 countries
worldwide

Contact

USA: +1 (0)309-540 5189 UK: +44(0)1923 606600

Other Products & Services

OTHER PRODUCTS

SOLUTIONS

SERVICES

- Automatic Transfer Switches
- Packaged substations
- Industrial control panels
- Battery cabinet
- Motor control system
- In-house fabrication
- Containerized Unit
- Busbar design
- Busbar manufacturing and fabrication
- Generator quick connect panels
- Support and service
- Control and monitoring solutions
- Busbar designs and manufacturing
- Field service/Site inspections
- Start-up and commissioning
- Annual maintenance
- Infrared scanning

ABOUT

We offer remote control and monitoring from your data center power. Improve efficiency and reduce power usage using our technology.

RPP
PDU
Panelboards
Input and output switchboards
Feeders with branch monitoring

Up to 480V
Up to 4000A
Multiple source
Standard and enhanced data monitoring device
front and rear access
multiple Input connections
Top or bottom cable entry/exit

Standard and custom options

Reliability

Engineering excellence

Vision

Our vision is to use our expertise, knowledge, and heritage to help the industry learn about the technologies we develop specifically to ensure business continuity and sustainability. We will continue to supply high-class customised systems to the industry and aim to develop our unrivalled technology even further to create even better technologies for removing particulates and contaminations.

Our aim is to provide the solutions to a universal problem. To use the latest technology and expertise to innovate, design and build premium systems aimed at protecting customers' assets and their reputation from contamination problems.

Values

We value honesty and integrity. Customers rely on us to supply them with the right system every time, helping them to reduce their costs and increase their efficiency. We value expertise and experience, reliable software/hardware, unrivalled technology and customisation, high-class immediate response technical support, and extended customer service.

Sustainability

We feel so strongly about sustainability, we have designed and manufactured unique breakthrough technology and products that provides excellent value by significantly reducing customers' emissions and fuel waste.

Ultimately, customers who purchase from us are not just saving themselves significant costs, but they are creating and solving problems of the future.
